

Instructions

The issue presented in the report must **relate to the topic of the Summer School**.

The aim is to pose a hypothesis that arises from the topic **of your choice** and to discuss it.

The report must be prepared according to the following instructions:

- at least two case studies must be briefly presented (from scientific articles);
- your own research can be presented as one case study;
- the language is English;
- the length is 6000 words/10 pages maximum (without abstract, contents, references and appendices);
- follow the template to structure the report.

Example:

Context: Organic pollution in marine waters

Topic: Air-sea exchange of organic pollutants

Hypothesis: High molecular chlorinated pesticides are able to volatilize from seawater.

Case study one: Chlorinated pesticides in Arctic region: air-sea exchange

Briefly describe the methods/findings.

Case study two: Air-sea exchange of flame retardants and chlorinated pesticides in the Bering Sea.

Briefly describe the methods/findings.

Discussion: Comparison/discussion of the case studies

Conclusion:

The high molecular chlorinated pesticides are able to volatilize from seawater under specific conditions....
